EDUCATION

• Lovely Professional University	Phagwara, Punjab
Bachelor of Technology in Computer Science and Engineering (CGPA: 7.09)	2023 – 2027
• A.S.M Convent School	Ballia, Uttar Pradesh
Senior Secondary	2022 – 2023

SKILLS

• Languages:	Java, C, C++, Python, SQL, TypeScript
• Frameworks & Libraries:	Next.js, TensorFlow, Keras, OpenCV, NumPy, scikit-learn
• Tools & Platforms:	Git, GitHub, VS code, Jupyter Notebook, MySQL
• Course Work:	Operating System, DBMS, Data Structure and Algorithm, OOPs, Computer Networks
• Soft Skills:	Analytical thinking, Problem-Solving, Communication, Adaptability, Decision Making

PROJECTS

PulseAI Prep – AI-Powered Interview Assistant GitHub Link Live Link	Aug '25 – Nov '25
• Deployed an AI-powered mock interview platform supporting real-time voice interviews, improving preparation experience for over 100+ users .	
• Integrated the Gemini API for adaptive question generation and automated scoring across communication, technical, and analytical dimensions.	
• Built secure authentication and performance analytics using Firebase Auth and Firestore for consistent user tracking.	
• Reduced response latency by 35% through optimized streaming through VAPI to deliver more realistic AI-led sessions.	
• Tech Stack: Next.js, TypeScript, Firebase, Gemini API, VAPI	

AI Music Mood Recommender – Emotion-Based Music GitHub Link Live Link	Feb '25 – Apr '25
• Developed a multimodal emotion-detection system that analyzes text, and facial expressions to recommend music aligned with the user's emotional state.	
• Implemented real-time-emotion detection using OpenCV and sentiment scoring using NLP pipelines.	
• Built a scalable recommendation flow integrating Gemini API to generate playlists based on mood vectors, user preferences.	
• Improved processing latency by 40% through model tuning and asynchronous request handling, enabling smooth real-time emotion-to-music recommendations	
• Tech Stack: OpenCV, NLP, TensorFlow, Python, Flask, Gemini API	

House Price Predictor – Data-Driven Real Estate Valuation System GitHub Link	Jan '25 – Mar '25
• Created a machine learning model to predict real estate prices with 92%+ accuracy using linear, ridge, and lasso regression.	
• Processed and engineered a dataset of 10,000+ property records including cleaning, feature engineering, and IQR-based outlier removal to improve model reliability by 30% .	
• Enhanced model performance using 5-fold cross-validation, reducing prediction (MAE/RMSE) errors by 18% .	
• Tech Stack: Linear Regression, Lasso, Ridge, Cross-Validation, Matplotlib, scikit-learn	

CERTIFICATIONS

• Oracle Cloud Infrastructure 2025 Certified Data Science Professional - Oracle	Sep '25
• Oracle Cloud Infrastructure 2025 Certified GenAI Professional - Oracle	Sep '25
• Cloud Computing - NPTEL	May '25

ACHIEVEMENTS

• Solved 500+ DSA problems across LeetCode and other platforms, built consistent problem-solving discipline with 125+ active days and earned multiple achievement badges for continuous learning.	Nov '25
• Achieved a LeetCode contest rating of 1650+ , ranking in the top 16% globally in competitive programming contests.	Sep '25
• Secured 2nd position in a 24-hour college hackathon by designing and developing a fully responsive website from scratch under intense time constraints.	Mar '24
